to Umesh ▾

Dear Mr. Dhimal,

I am writing you to respectfully inquire two things from you. First I must ask how can the average Nepali citizen take care of their local infrastructure, environment, and roads? Also, I was wondering if you could get me in contact with someone who has more background with Irrigation policy and systems in Nepal. Thank you so much for everything you have done to help me thus far. I have a big project on the way and I am very excited to share it with you in the next upcoming weeks.

Yours Truly,
Chad

Dear Mr. Sype,

Mainly the local infrastructure, environment and roads are usually take care forming Users Group, which have its roles to maintain & partnership with local government to upgrade.

Here I am forwarding Mr. Mohan Shakya's email (shakymohan@yahoo) who has been working more than decade in Irrigation sector in Nepal. I have requested Mr. Mohan to help your queries.

regards
umesh dhimal.

(The source he recommended never emailed me nor responded to the email I sent him.)

My response to his response above and my Initial Artifact review request.

Dear Mr. Dhimal,

Thank you so much for responding to email and asking your colleague, Mr. Mohan Shakya, to help me. I was wondering if you could ever so kindly give me more information on the User Groups that you mentioned in your email. Once again I am incredibly thankful for everything you have helped me do thus far. My research and project would not be anywhere without you.

Yours Truly,
Chad

Dear Mr. Dhimal,

I have been working on making an Informational Earthquake and Structural Safety video in Nepali for the average citizen. Attached to this email is the script for the video. Please only read what is written on the left side. The right side of the document is meant for the animator who will be working on this video. I would really appreciate your input on what I should add or change. If you have any questions please feel free to ask.

Regards,
Chad Sype

Sending my request for his approval on my artifact in a new email chain (2nd time) and his response.

Dear Mr. Dhimal,

As I have mentioned in my previous email, I have been working on making an Informational Earthquake and Structural Safety video in Nepali for the average citizen. Attached to this email is the script for the video. The left column is what will be said by the Narrator in Nepali while the right column details what the animators will do. I would really appreciate your input on what I should add or change. If you have any questions please feel free to ask. I really need a response by November 19th at the latest. I'm sorry for any inconvenience but I really appreciate your willingness to help so far.

Regards,
Chad Sype

Dear Mr Sype
Do you want me to narrate in nepali or write ?

Rgds

Dear Mr. Dhimal,

You do not need to narrate or write in Nepali. I was hoping you could review everything I stated in the script for accuracy and correctness. I was hoping you could take a look at the script to see if there is anything that should be changed, taken out, or added in. If you would like to translate in writing the left column of the document please feel free to.

Thank you very much,
Chad Sype

Dear Mr. Sype,
Please find the edited script.

regards
umesh dhimal

Translation possibility?

Chad Sype [redacted]

Nov 20 (1 day ago) ★

to Umesh ▾

Dear Mr. Dhimal,

I know I had told you in a previous email that I didn't need you to translate the left column in my script. However, upon further reflection, I've realized that it would be incredibly beneficial if I could have someone who speaks Nepali daily translate my script. I was hoping, in a kind act of support, if you could translate the left column of my script into Nepali. This would be incredibly helpful and impactful on the effectiveness of this video. If you were to do this, I would kindly ask that you make sure each item on the right column lines up with what will be said in the left column. I don't know how long this is going to take but if I could get this translated as soon as possible that would really help.

Thank you for all of your amazing help,
Chad Sype

Dear Mr. Dhimal,

I would appreciate it if you could translate the new attached script.

Thanks again,
Chad Sype
